- ~ SAFE, MADE IN A HUMAN FDA LABORATORY.
- ~ COLD PROCESSED TO RETAIN EACH INGREDIENT'S RICH NUTRIENTS.
- ~ STRENGTHENS YOUR PET'S IMMUNE SYSTEM.

### What pet owners say about NuVet Plus®

He has suffered from Dry Eye, skin allergies which were moderate to severe, and constant ear infections... I started Barney on NuVet about 2 months ago and he is a changed dog. We no longer have any of the above mentioned problems.  
— Oliver H., Florida

My Katie is two years old and not too long ago suffered from severe hot spots, hair loss and intense itchy skin... About 6 weeks into her treatment, her fur started to grow in. She has almost been on this amazing supplement for 3 months now. I'm literally in awe... Thank you so very much for this lifesaver.  
— Tracy W. Canada

I want to express my gratitude and thanks to you for producing NuVet Plus... Missy is a rescue cat and I am not sure what her life was like for the first two years of her life. The owner gave me a jar of the NuVet Plus powder to put in her food and see if it might help her. BOY OH BOY!!! What a difference. First of all she loves the taste in her food and is now walking without a limp and has even started to run a little bit.  
— Faith L. Arizona

My 13 year old Baxter has been on the NuVet labs for two years. He was going blind in one eye and just didn't have the energy that was once there in the younger years. Now he is no longer having eye sight problems and has the energy of a 2 year old... When people come into the shop and see him, they can't believe his age...  
— Suzy S. Florida

### NUVET PLUS® INGREDIENT LIST: A precise combination of human grade, natural vitamins, minerals, herbs, antioxidants, bioflavonoids, fatty acids, and amino acids.

**ALFALFA** - A nutritious source of vitamins, minerals, enzymes, chlorophyll and dietary fiber. Contains Vitamin K, a pre-biotic, which aids digestion by influencing enzyme activity in the gastrointestinal tract. Helps relieve urinary and bowel problems and helps improve appetite. Alfalfa has also exhibited antibacterial and antitumor properties. (Canine formula only)

**ALPHA AMYLASE** - A digestive enzyme that helps augment the metabolism of carbohydrates. Assists in the absorption of nutrients into the cellular network.

**AMINO ACIDS** - Aid in building new muscle, bone and tendon cells. Vital for metabolism, stamina, brain function and immune function.

**BETA CAROTENE** - Converts into Vitamin A, a powerful antioxidant, that can help protect against cancer and other diseases. Helps counter fatigue, respiratory infections and skin disorders.

**BLUE GREEN ALGAE** - A rich nutritional food that contains essential amino acids, chlorophyll and trace minerals. Helps strengthen the immune system. Promotes intestinal regularity, purifies the blood and assists in stabilizing proper blood sugar levels. Aids in cholesterol-reduction and mineral-absorption.

**BREWER'S YEAST** - A balanced, natural source of B-vitamins, including folic acid, that helps maintain healthy skin, coat, nerves and eyes. Proven to be helpful in reducing the number of fleas in pets.

**CAT'S CLAW (UNA DE GATO)** - An herb with amazing healing properties. It nourishes the immune system, enhances white blood cell formation and promotes cardiovascular health.

**CHICKEN LIVER** - A rich source of essential amino acids, B-vitamins & folic acid, Iron, Copper and Magnesium. Strengthens the nervous system. Aids in digestion, proper tissue development and production of red blood cells.

**COPPER** - Assists in the body's healing processes. Promotes good energy production. A needed mineral

for healthy nerves, joints and skin.

**EVENING PRIMROSE OIL** - Aids in the management of arthritis and rheumatism. Helps reduce the risk of high blood pressure and heart disease.

**FOLIC ACID** - Necessary for healthy growth and division of cells. Helps regulate embryonic and fetal nerve cell formation. Needed for the formation of red blood cells and energy production. Strengthens immunity by aiding the formation and functioning of white blood cells. Aids liver and glandular health.

**IRON** - Helps with protein metabolism and promotes proper tissue growth. Necessary for energy production and a healthy immune system.

**L METHIONINE** - An essential amino acid that helps to buffer and eliminate heavy metals in the body. It is a good source of sulfur, which deactivates free radicals. Beneficial for allergies by reducing histamine levels in the body. Can help delay the development of age-related cataracts.

**MAGNESIUM** - Important for energy and proper maintenance of bones, teeth, arteries, heart and nerves. Helps prevent cardiovascular disease, osteoporosis, and certain forms of cancer.

**MANGANESE** - Needed for normal skeletal and nerve development and for proper lubrication of the joints. Required for protein, fat metabolism and blood sugar regulation.

**OYSTER SHELL** - Provides Calcium and Phosphorus in the proper ratio for structural integrity of bones and teeth. Calcium is vital for the functioning of the heart, nerves and muscles. Phosphorus is necessary for blood clotting, cell growth and kidney function.

**PAPAIN** - Aids in protein digestion and metabolism. Helps to cleanse the tissues and walls of the gastro-intestinal tract.

**PINE BARK (PYCNOGENOL®)** - Extracted from the bark of French maritime pine trees, Pycnogenol® contains a natural blend of bioflavonoids. One of the most effective antioxidants known, it reduces oxidative damage to cells and vital tissues caused by free radicals. Exhibiting strong anti-inflammatory properties it

has been shown to reduce cardiovascular disease and arthritis.

**POTASSIUM** - Important for maintaining a regular heart rhythm and a healthy nervous system. Required for the proper functioning of muscles. Works with sodium to regulate the amount of water in the cells.

**SELENIUM** - A mineral needed for pancreatic function and tissue elasticity. Plays a vital role in regulating thyroid hormone and fat metabolism. When combined with Vitamin E it aids in the production of antibodies and helps to maintain a healthy heart and liver. Functions as a preventative for certain types of tumors.

**SHARK CARTILAGE** - An anti-inflammatory healing agent that is effective in the treatment of arthritis and hip dysplasia. Clinically, it has been shown to help reduce cancerous growths by impeding the formation of new blood vessels to the tumor.

**TAURINE** - An essential amino acid that aids in the digestion of fats in the small intestine. It helps prevent high cholesterol levels by supporting the liver. Vital for the health of the heart muscle, it lowers blood pressure, helps prevent diabetes and balances the levels of Sodium, Potassium and Magnesium in the cells. Vital to maintain the integrity of the retina of the eye. Feline formula only.

**VITAMIN A** - See Beta-Carotene

**VITAMIN B COMPLEX** - Helps the functioning of the brain and the nervous system. Promotes muscle tone in the gastrointestinal tract. Helps to maintain the health of skin, coat, eyes, mouth and liver.

**VITAMIN B1 (THIAMINE)** - Essential for normal functioning of the heart, nerves, muscles, skin and digestive system.

**VITAMIN B2 (RIBOFLAVIN)** - Necessary for carbohydrate-fat-protein metabolism, and red blood cell and antibody formation. Essential for maintaining healthy eyes, skin, and coat.

**VITAMIN B3 (NIACIN)** - Promotes proper growth and function of the nervous system. Also helps maintenance of healthy

skin, tongue and digestive system.

**VITAMIN B5 (PANTOTHENIC ACID)** - Known for its stress-relieving properties. Plays an important role in the production of the adrenal hormones and the formation of antibodies. Needed for normal functioning of the gastro-intestinal tract.

**VITAMIN B6 (PYRIDOXINE)** - Necessary for carbohydrate-fat-protein metabolism, antibody and red blood cell formation. Aids digestion.

**VITAMIN B12 (COBALAMIN)** - Helps maintain the fatty sheaths that cover and protect nerve endings. Aids in cell formation and cellular longevity. Helps in the utilization of iron. Important for the prevention of anemia, fatigue, and neurological deterioration.

**VITAMIN C (ESTER C®)** - A powerful anti-oxidant that is vital for the immune system and a myriad of metabolic processes in the body. Promotes the formation of collagen and the growth and repair of cell tissue. Aids in proper adrenal gland function. Helps to eliminate toxic substances such as heavy metals from the body. Reduces the risk of cataracts.

**VITAMIN E** - A very effective antioxidant that protects the cell structure against free radicals. Aids in the utilization of Vitamin A. Improves the immune system, blood circulation and wound healing. Reduces the potential for heart disease, anemia, and neurological abnormalities.

**WHEY PROTEIN (FELINE FORMULA)** - A highly-digestible and complete protein containing 20 amino acids including methionine, lysine, and taurine. (Cats are unable to produce their own taurine as dogs do). Contains peptides that help boost the immune system.

**ZINC** - Required for protein synthesis and collagen formation. Promotes normal growth, cell division and aids wound healing. Helps to maintain normal levels of Vitamin A in the body. Works with red blood cells to move carbon dioxide from the tissues to the lungs. Promotes a healthy immune system.
